

WE **WELCOME** YOU
TO JOIN **IENE** IN :

2.

Attendance at IENE
International Conferences
every two years.

3.

Getting involved
or benefiting
from technical
workshops, seminars,
and educational
opportunities.

1.

Participation in
working groups
(e.g., Safer Railways
for Wildlife, Animal
Detection, GreenWEB
- a regional working
group for Eastern
Europe and the
Balkans).

4.

Staying informed
with the bi-monthly
newsletter covering
topics from policies
to research.

Harmonizing transportation & nature

Find out
more here

www.iene.info

IENE, the **Infrastructure & Ecology Network Europe**, actively strives to reconcile transportation with nature.

Established in 1996, IENE has expanded to encompass more than 420 members globally. The network is dedicated to promoting sustainable and biodiversity-friendly transportation solutions and mitigating the major threats that transportation infrastructure poses to biodiversity, causing habitat fragmentation and species decline.

— A UNIQUE APPROACH : CONNECTING PEOPLE, CONNECTING LANDSCAPE

IENE serves as a unique open network predominantly in Europe but with connections worldwide, linking authorities, practitioners, ecologists, and NGOs. Recognized as a knowledge hub in transport and ecology, IENE collaborates with organizations like IUCN, UNEP, the European Commission, the worldwide road and railway association PIARC, and UIC.

— CRUCIAL AND URGENT MISSIONS

- 1.** Mainstreaming biodiversity into transport infrastructure decisions, legal frameworks, planning, and technical guidelines.
- 2.** Fostering global collaboration and research for innovative solutions to ecological conflicts within transport infrastructure.
- 3.** Building capacity and sharing knowledge for decision-makers, encouraging public-private collaboration.
- 4.** Advocating for Green Infrastructure to preserve biodiversity, enhance connectivity, and ensure a net gain.

— A SIGNATURE : THE BIODIVERSITY & INFRASTRUCTURE, A HANDBOOK FOR ACTION

IENE gathers its knowledge in its online reference handbook : Biodiversity & Infrastructure. Built on decades of research and practice, the handbook promotes best practices in resilient and sustainable infrastructure, focusing on nature-based approaches, habitat preservation, green infrastructure enhancement, and nature restoration.

— AN ACTIVE, INVOLVED, AND INCLUSIVE GOVERNANCE !

The General Assembly oversees IENE, electing the Governance Board for daily operations.

The Scientific and Expert Committee handles scientific matters.

The Executive Secretariat supports and manages IENE activities.

— FUNDING

Supported by the Swedish Ministry of Transport, the French Ministry of Environment, the Dutch Ministry of Infrastructure and Water, as well as members and sponsors.
